

Glyphosate restrictions and bans around the world – also included other pesticide restrictions which might not be glyphosate specific but effectively stop its use.

UK:

Brighton – In March 2016 Brighton & Hove Council voted unanimously to ban the use of glyphosate and move to pesticide free methods <http://www.pan-uk.org/news/brighton-hove-to-stop-using-glyphosate>

Hammersmith & Fulham – The London Borough has decided to go pesticide free and is now trialling non-pesticide methods. This makes it the first London Borough to do so.
<http://www.standard.co.uk/news/london/council-to-stop-spraying-parks-with-health-risk-weed-killer-a3262826.html>

Bristol – Glyphosate free trial going ahead in Ashley District for an update on the trial please see the second link <http://www.bristolgreenparty.org.uk/news/glyphosate-free-ashley-trial>
<http://www.pan-uk.org/news/has-bristol-non-herbicide-weed-control-trial-been-designed-to-fail>

Glastonbury – Council votes to stop the use of glyphosate
https://www.facebook.com/permalink.php?story_fbid=1131627070200447&id=204401476256349&substory_index=0

Erewash - Erewash Borough Council has stopped using glyphosate weedkillers containing polyethoxylated tallow amines (POEA), or tallow, which, some evidence suggests, is toxic to human cells and amphibious wildlife <http://www.nottinghampost.com/Erewash-Borough-Council-axes-use-allegedly-toxic/story-27998299-detail/story.html#ixzz3sbbW27LD>

Aberdeen – using hot water to reduce pesticide use
http://www.aberdeencity.gov.uk/CouncilNews/ci_cns/pr_weedkiller_230715.asp

Edinburgh – stopping the use of glyphosate following public concerns about carcinogenic nature of glyphosate <http://www.hortweek.com/councils-alternative-weed-control-move-hailed/landscape/article/1374960>

Frome – the local council has banned the use of glyphosate - <http://www.somersetlive.co.uk/weed-killer-linked-to-birth-defects-and-kidney-failure-banned-by-town-councillors/story-29517271-detail/story.html>

Europe:

Malta – Has announced that it will be the first EU country to adopt a complete ban on the use of glyphosate <http://www.truth-out.org/buzzflash/commentary/malta-likely-to-become-first-european-country-to-ban-glyphosate>

France – restrictions in place on sales to the public, no longer in self-service aisles but behind (under) the counter. France will ban all non-agricultural pesticides by 2020 so glyphosate will no longer be available to the public. There are already over 400 pesticide free towns in France, a further 400 with

It doesn't have to be this way...

Help PAN UK make our towns and cities pesticide free

restrictions on pesticide use in public places. <http://www.newsweek.com/france-bans-sale-monsantos-roundup-garden-centers-after-un-names-it-probable-343311> France will also ban glyphosate regardless of whether it is approved for use in the EU <http://www.globalresearch.ca/france-to-ban-glyphosate-regardless-of-eu-vote/5526489>

Netherlands – Has banned non-commercial use of glyphosate to come into effect later this year - <http://www.collective-evolution.com/2015/05/30/why-the-netherlands-just-banned-monsantos-glyphosate-based-herbicides/>

Germany – The REWE retail group in Germany has stopped selling glyphosate products <http://www.theguardian.com/sustainable-business/2015/aug/07/supermarkets-garden-centres-weedkiller-ban-cancer-glyphosate-monsanto>

Germany - Germany's state ministers decided to take action when it was announced that they had drafted a resolution for the for "the supply to and use (of glyphosate) by private persons to be banned for precautionary reasons <http://www.march-against-monsanto.com/german-states-call-for-eu-wide-ban-on-monsantos-roundup/>

Switzerland – Two Swiss retailers, Coop and Migros, have stopped selling glyphosate products <https://www.organicconsumers.org/news/swiss-supermarkets-stop-sales-glyphosate-over-health-concerns>

Belgium – Many of the municipalities in Belgium will be pesticide free by 2017. No spraying of glyphosate or any other pesticide in public areas.

Denmark – The Working Environment Authority has declared glyphosate to be a carcinogen following the WHO report. This means that "The work inspectors in Denmark listed Roundup as carcinogenic, meaning that they will demand that due care is taken when used, and they will recommend a change to other less toxic chemicals," - however, there is no ban in place, but the possibility of restrictions in agricultural use could be on the agenda.

Luxembourg – 42 Communes in Luxembourg have banned the use of pesticides <http://www.wort.lu/en/luxembourg/nature-conservation-42-communes-in-luxembourg-ban-pesticide-use-56967ccd0da165c55dc5125b>

Spain - Barcelona has banned the use of glyphosate in public parks and other areas <http://www.gmwatch.org/news/latest-news/16617-barcelona-bans-glyphosate-in-public-parks>

Spain – A number of other regions in Spain have now banned glyphosate including Madrid http://sustainablepulse.com/2016/03/29/spanish-regions-agree-to-ban-glyphosate-herbicides-over-health-fears/#.V5lli_krKUK

Germany – Hamburg has stopped the use of glyphosate <http://m.welt.de/regionales/hamburg/article151152853/Hamburg-stoppt-Einsatz-von-Glyphosat.html>

North America:

Canada – 8 of 10 Canadian Provinces has in place some form of restriction on the use of non-essential cosmetic pesticides including glyphosate. These cannot be used in public areas or by the public out of doors. See Toronto case study <http://www.pan-uk.org/images/pft/toronto-pesticide-by-law.pdf>
